To whom it may concern

Warsaw, 3rd October 2019

Dear Sir/Madam,

I am looking for a remote Full Stack Python Developer or IT Consultant position, either permanent or B2B on project basis.

I have been working on IT projects for 19 years on various positions. I have 16 years experience in management positions, leading teams of developers and consulting on software solutions, system integrations and IT processes.

I have been working with Microsoft Services on implementing a software platform for a major Polish bank. I have also been working on many other projects, deploying a mature Identity Management processes and integration for financial and telecom institutions.

I like working with the latest cutting edge technology and thus have been working with different vendors and technologies, from Java, through .NET to Python. I also keep tabs on what is what in SaaS offerings.

Everywhere I work, I try to implement processes that increase reliability, automation and accountability. I believe it is a foundation for great quality in any IT related project and leads to achieving goals quickly. Repeating great performance in each new iteration without being bogged down by regression is key in agile development. I've been consulting for a 1200 employee software vendor to improve their software development process.

Recently I helped to build a recruitment platform with over 15 milion profiles of IT specialist. Prior to that I built a SaaS grade book for Polish schools which I sold as a finished product to a publishing house.

My calling rate is 30\$ per hour or 5000\$ monthly. I am happy to take on a trial project to showcase my skills and product quality.

In attachment you will find my full resume. Please check out my LinkedIn profile and recommendations.

Yours sincerely,

Janusz Skonieczny

Common European Framework of Reference for Languages

Communication skills

I have good communications skills and experience gained while leading development teams, sales of my company services and roles such as NGO board member and council member for my home town. I try to take advantage of non violent communication and conflict resolution skills.

I have experience with many project management, communication and collaboration related tools, notable examples are: JIRA, Asana, Slack, Basecamp, Trello, GSuite Documents.

As an analyst I have gained very good knowledge of MS Word document setup. I like to have interconnectivity and auto updating reference fields throughout my documents. Locked styling protects consistent look.

Organisational / managerial skills

I have been a founding partner in Qualent Software and a CTO and shareholder in Internetium startups, where I have coached and shaped 10 person development team.

Job-related skills

Python, Django, Flask, PyTest, Selenium, SASS, Bootstrap, Heroku, Docker, Dokku, GIT, Linux server admin, HTML5, jQuery, JavaScript, EmberJS

Developing and Implementing Windows®-based Applications with C#™ .NET

Designing and Implementing Databases with Microsoft® SQL Server™ 2000 Enterprise Edition

NGO voluntary work

I am a passionate NGO supporter and I help my local community through organization of various social events, like yearly bazaar of used toys for kids, local tourism, bird watching, neighborly DIY and sharing achievements hobby and art projects.

I also help to improve local government oversight by spreading knowledge about watchdog operations and the right to public information by citizens.

I am a consultant for NGOs within the Sector-3.0 project ran by Polish American Freedom Foundation (PAFW) and Fundacja Rozwoju Społeczeństwa Informacyjnego (FRSI). I help NGOs fulfill technology related needs but also help in law aspects of running an NGO.

Programming trainer for teachers

On a country level I help to spread programming skills through projects training teachers in the use of modern programming languages, robotics and skills related to programming but not necessarily used through computers.

I also advocate for use of professionally required tools that are easy to integrate in school projects but are often ignored by the lack of interest in what employers now really require.

I helped to create a Python 101 course for Koduj z Klasą. I am a trainer in Misja Programowanie.

Charter School

I am a board member of my kids charter school. I help to push our teachers into innovative ways to teach and implement newest knowledge about successful education in day to day work.

We want to create a school environment that will help students to fulfill their potential. We change schooling from one-way knowledge passing activities to an environment where students learn to constantly acquire knowledge themselves and teachers are there to steer and help along the way.
